- 3) Information Disclosure Statement(s) (PTO-1449) Paper No(s) 5.
- 4) Interview Summary (PTO-413) Paper No(s). _____.
- 5) Notice of Informal Patent Application (PTO-152)
- 6) Other:

1. Claims 2,4 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claim 2, line 2, change “trail” to “trial”. See also claim 4.

In claim 4, line 4, “said is” is not understood.

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.

2. Claims 1-7 are rejected under 35 U.S.C. 102(a) as being anticipated by Endo et al.

Endo et al. teach an image forming apparatus comprising an image input means 106 for scanning an original document to produce digital image data, a storage means 501, 510 for storing the digitized image data and image forming means 118 for reading the image data and forming an image onto a paper sheet. Various settings can be activated for producing a desired output such as density, duplex mode, magnification, number of sets to be produced, etc. A sample set of sheets can be formed by activating a sample set command key 209. When the sample set key is activated the image forming apparatus switches to a mode wherein a set of copies are made and output to a sorter. Thereafter the image

forming apparatus will enter a waiting mode which waits for an operator to either accept the output copies or change one of the settings (see col.13, lines 1-20). A copy set numeral can be changed according to whether the sample copy set is accepted or not. If it is accepted, then the remaining desired sets will be the one minus the originally input desired sets. If it is not accepted, then the remaining sets will be the original input desired sets. See col.25, lines 45-63.

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Ishikawa, Telle, Kizaki, and Hyo (JP) all teach of a trial copy mode.

4. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Robert Beatty whose telephone number is 703-308-1372. The examiner can normally be reached on M-F from 9 to 6.
